# High End in your **car**

**The technology of the future  
as a solution today - the  
StradiSound Set System.**

---

## Why is it so special?

### How does it work?

First we mount a special "nano-chip" into each speaker. A software solution within these "nano-chips" then makes sure, only clean sound-waves leave the speaker.

In case there are several speakers working at the same time, the "nano-chips" within the speakers distribute the content among each other based on sound groups. We call each sound group that gets assigned to a speaker, a Set.

- 1 Bass and baseline heard simultaneously.
- 2 Physical movement of singers or instruments are reflected in the playback.
- 3 No interference.
- 4 Clean sound even at high volumes, without sound clots.
- 5 No need for extra sub-woofers in cars.
- 6 Also works in convertibles and roadsters.

In case of any questions, feel free to contact us:

# The technology of the **future** as a solution today

The most advanced sound system yet.

## **What can I do, if I want the StradiSound set System in my car?**

Ask for detailed info at our stand at Halle 1 c12, or request an offer through an e-mail: [welcome@stradisound.com](mailto:welcome@stradisound.com).

## **Is there a warranty on the StradiSound Set Systems?**

Yes! We give 5 years of warranty on our products.

## **How much would a StradiSound Set System for my old car cost?**

We give tailored offers for each individual car, but 1500 EUR plus additional costs is a starting estimate.

## **Can the StradiSound Set System be built into used cars?**

We plan to retrofit used cars with the StradiSound Set System, however only for a testing period, and with limited quantities. Later, the system will only be available as an optional feature when buying a new car.

## **How can I get the StradiSound Set System if I'm about to buy a new car?**

Simply ask for it at your dealership as an optional feature. Should you have any questions, please contact us at [welcome@stradisound.com](mailto:welcome@stradisound.com).
